TWN Unveils New Water Transfer Printing Tank

1.2 Meter Gunsmith Printing Tank (WTP-1.2)

Miami — August 12, 2009 — Business Development Partners, LLC in conjunction with TWN industries is proud to offer the first Water Transfer Printing tank designed with the Gunsmith and small parts customizer in mind. With its reasonable size of 48” long x 24” wide x 30” deep it is ideal for their limited run custom decorating needs. While the three-stage stage system including main processing tank, filtration trap, and heating tank, along with surface skimmer overflow brings the quality TWN industries provides in all of their tank manufacturing. Along with purchase of one of the WTP 1.2 the decorator also gains access to the hundreds of license free film that TWN has to offer.

Pricing

For the low price of \$2,900 the WTP 1.2 comes with two days of hand on training at the state of the art TWN industries factory in Princeton, FL. This industry gold-standard training will be configured to the wants and most importantly the needs of an aftermarket decorator.
